

OVER A CENTURY OF PIONEERING

ALLERGY IMMUNOTHERAPY

STALLERGENES  GREER

PORTFOLIO

OVER A CENTURY OF EXPERIENCE AND EXPERTISE IN ALLERGY IMMUNOTHERAPY

Stallergenes Greer is a global biopharmaceutical company resulting from the combination of two well-established allergy immunotherapy companies. With over 100 years of allergy immunotherapy experience, we are committed to providing high-quality allergy immunotherapy products as well as emerging allergy solutions to healthcare professionals and their patients.

More and more people are suffering from allergies

More Americans than ever say they suffer from allergies—it's among the country's most common, but overlooked diseases.¹

More than
**50 million
Americans**
suffer from
allergic rhinitis

Up to
30% of adults and
40% of children
are affected by allergies

Allergies represent the fifth-leading chronic disease in the United States in people of all ages (third most common in children under 18 years old)

We can help you offer a portfolio of allergy testing and treatment options for your patients

By providing allergy immunotherapy through a portfolio of products and services, you can offer your patients other treatment options.²

Stallergenes Greer understands the resources that are required for medical practices to offer allergy immunotherapy. We will work to help you incorporate allergy immunotherapy into your practice, providing product consultation and support, so you can help your allergy patients get the testing and treatment options they need.

OFFERING COMPREHENSIVE SUPPORT FROM ALLERGY IMMUNOTHERAPY EXPERTS

The allergy immunotherapy expertise of Stallergenes Greer is readily available to you—in person, by phone, or online—when you need answers to questions about our allergy immunotherapy services and products.

ACQUIRE THE SKILLS TO USE OUR **SKIN TESTING DEVICES WITH CONFIDENCE**

GREER® Skin Testing Proficiency Program

Our Skin Testing Proficiency Program can help your staff feel confident in skin testing by teaching the proper protocol needed to achieve reliable results.

This hands-on training presentation, led by one or more of our allergy immunotherapy professionals, is designed to train you and your staff to properly and safely use our skin testing devices.

GREER® Skin Testing Proficiency Program offers:

- Pre- and post-evaluation forms to help assess participants' skin testing abilities before and after training
- Skin testing instruction brochure, with easy-to-follow, step-by-step directions and protocol for achieving proficiency using our skin testing devices, Skintestor OMNI™ and GREER® Pick®
- Acknowledgements for demonstrating proficiency and for demonstrating the ability to train others on proficiency

PROVIDING A RANGE OF ALLERGENIC EXTRACTS AND SUPPLIES

GREER® Extracts™

Count on quality extracts from Stallergenes Greer. We can offer your practice:

- A wide selection of allergenic extracts
- A broad selection of formulations
- Quality—inspections are performed throughout our extract process, meeting federal quality and safety requirements

GREER® Sterile Diluents™

You have options with our selection of sterile diluents; available in various vial sizes, formulations, and fill volumes.

GREER® Sterile Empty Vials™

Our vials for extract mixing and storage are available in a range of industry-relevant sizes.

GREER® Versa Vial Rack®

Keep extracts organized with our portable and space-saving Versa Vial Racks, available in different styles and space-saving sizes to fit your specific needs.

Stallergenes Greer offers a multitude of other products to support allergy immunotherapy testing and treatment. To learn more or request a catalog, please contact a Customer Care Specialist at 800-378-3906.

GREER® EXTRACTS IMPORTANT SAFETY INFORMATION

WARNING: ANAPHYLAXIS

- Do not inject intravenously.
- Allergenic extracts may cause severe life-threatening systemic reactions, including the rare occurrence of anaphylaxis or death. Systemic reactions include: generalized skin erythema, urticaria, pruritus, angioedema, rhinitis, wheezing, laryngeal edema and hypotension. Other adverse reactions include: nausea, emesis, abdominal cramps, and diarrhea.
- Intended for use only by physicians who are experienced in the administration of allergenic extracts. Initial dose must be based on skin test.
- Observe patients in the office for at least 30 minutes following treatment. Emergency measures and personnel trained in their use must be available immediately in the event of a life threatening reaction. Immunotherapy may not be suitable for patients with medical conditions that reduce their ability to survive a systemic reaction.

Please see enclosed Package Inserts, including Boxed Warnings, in pocket.
